

Biomass Suppliers List

Waste Wood Guidelines

Issue 1.0

Issue: 1.0	Waste Wood Guidelines	
Date: 04.03.2022		Page 1 of 4

This is guidance to help you meet the requirements of the RHI Regulations for registrants on the BSL for the 1st of April 2022 for waste derived wood fuel.

If you are a Self-Supplier and burning waste fuel please follow **A**.

If you are supplying waste fuels please follow **B**.

If you are burning and supplying waste fuels follow **A. & B**.

A. Self-Suppliers Burning Waste Wood Fuel

What do you need to do? - As a burner of waste wood, you will need to send an email declaring that you have the correct permits or exemptions and send their respective registration numbers to bslwaste@woodsurre.co.uk from your master user email address, identifying which BSL number(s) this relates to by **30th March 2022**.

Failure to comply, will lead to removal of your BSL fuel listing and could lead to action from your local environmental authority or Ofgem. Compliance will be verified at audit by BSL Administration.

Further Help

The BSL requirements are aligned to Ofgem guidance on waste wood. For more information please visit - [Ofgem](#)

To confirm if the woodfuel you are processing and burning is solid biomass contained in waste please refer to the Ofgem flow diagram to clearly define your fuel type. [Ofgem Flow Diagram](#)

If your fuel is defined as waste you will need to have the following:

- You will need proof that you are permitted to burn your waste as a fuel in your boiler. You must have a permit or exemption from your local council or regional environmental authority.
 - On your permit from your Local Council you will find a registration number
 - or
 - Other permits or exemption reference(s) can be found here:
 - Environment Agency: Registration Numbers - [Public Register](#)
 - Natural Resources Wales: Permit Numbers - [Public Register](#)
 - Scottish Environment Protection Agency: Licence Numbers - [Public Register](#)
- If you process the waste to make it a fuel or transport it you will also need to demonstrate that you are permitted to do so.

B. Supplying Waste Wood Fuel

What do you need to do? As a supplier of waste wood, you will need to send an email declaring you have the correct permits or exemptions and send their respective reference numbers to bslwaste@woodsure.co.uk from your master user email address, identifying which BSL number(s) this relates to by **30th March 2022**.

When selling any waste fuel, it must have a EWC (European Waste Catalogue) code. BSL guidelines require you to define your waste wood clearly for any customers using WRA guidance. [WRA Guidance](#)

Failure to comply, will lead to removal of you BSL fuel listing and could lead to action from your local environmental authority or Ofgem. Compliance will be verified at audit by BSL Administration.

Further Help

The BSL requirements are aligned to Ofgem guidance on waste wood. For more information please visit - [Ofgem](#)

To confirm if the woodfuel you are supplying is solid biomass contained in waste please refer to the Ofgem flow diagram to clearly define you fuel type. [Ofgem Flow Diagram](#)

If your fuel is defined as waste your BSL Application will need to have the following:

- You must have a procedure in place to ensure the users of the waste fuel are permitted to burn in their appliance.
- You will need evidence that you are permitted to process and transport waste through the relevant permit or exemption from your regional environment authority. (see comment above)
 - On your permit from your Local Council you will find a registration number
 - or
 - Other permits or exemption reference(s) can be found here:
 - Environment Agency: Registration Numbers - [Public Register](#)
 - Natural Resources Wales: Permit Numbers - [Public Register](#)
 - Scottish Environment Protection Agency: Licence Numbers - [Public Register](#)
